June 2018

Confidential

# Product MDM 9.0 Highlights

# Product MDM Release 9.0 Highlights

**Product Data  
Syndication Platform**

**GDSN Publisher  
& Receiver Solution**

**Translation Service  
Integration**

**Composite Attributes**

**Industry Standards  
Update**

**User Experience,  
Data Governance,  
Workflows**

**Improved Image &  
Asset Management**

**Guided Data Entry**

**Print Publishing**

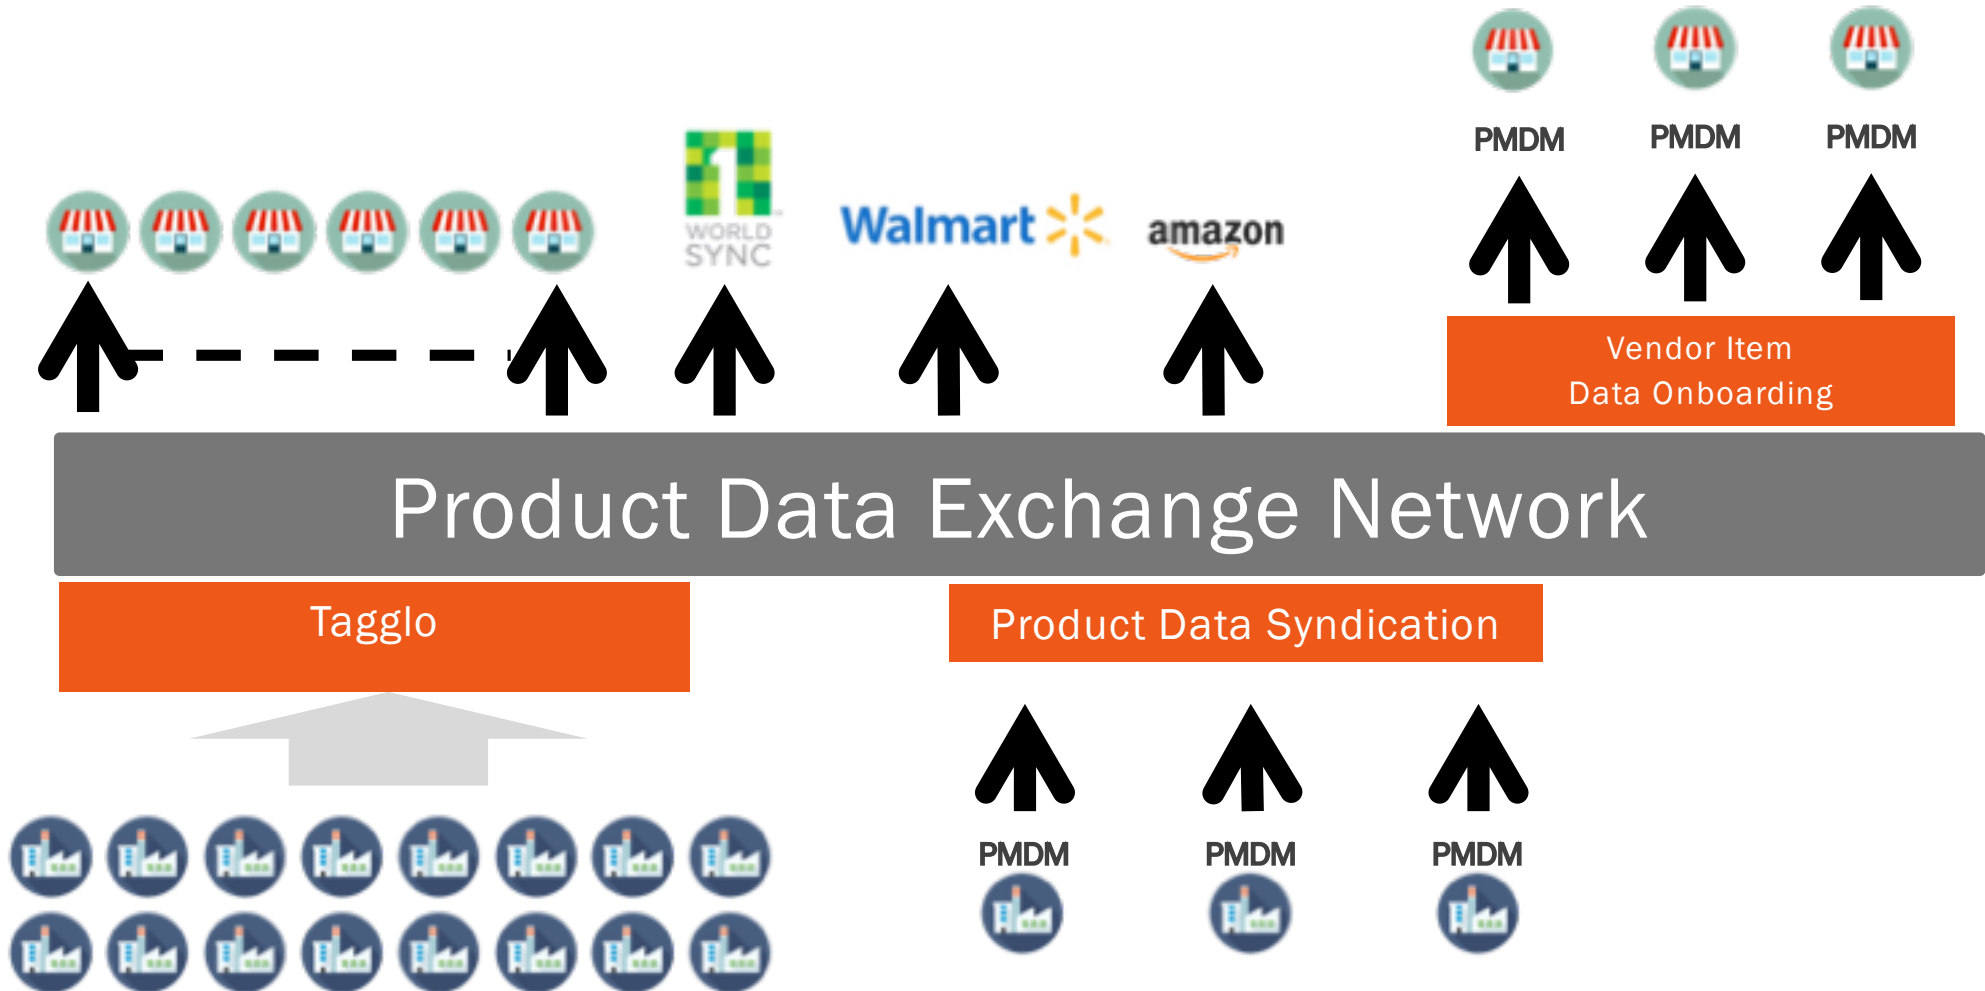

**Data Exchange and  
3rd Party Tool  
Integration**

**Automotive**

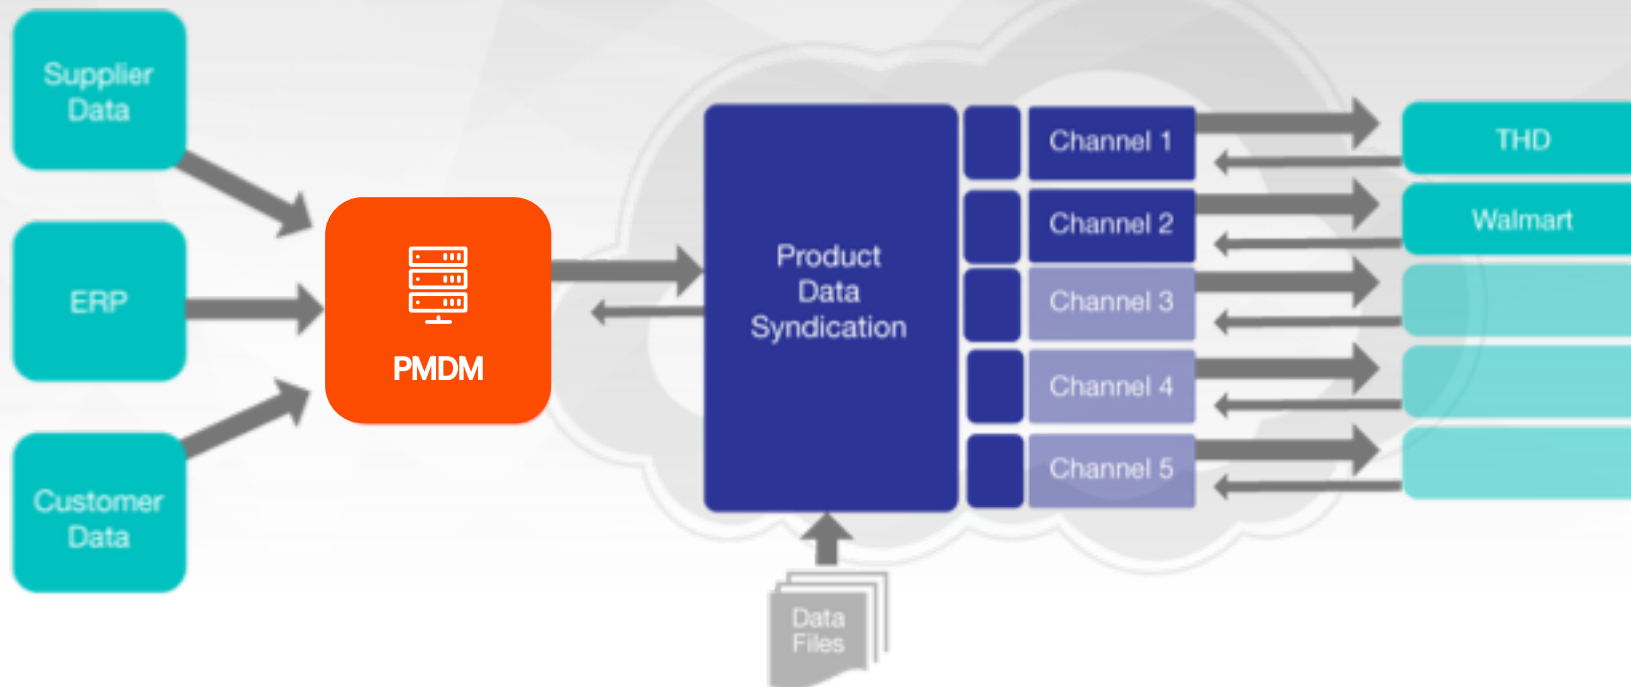

# Product Data Exchange Network

# Product Data Syndication Platform

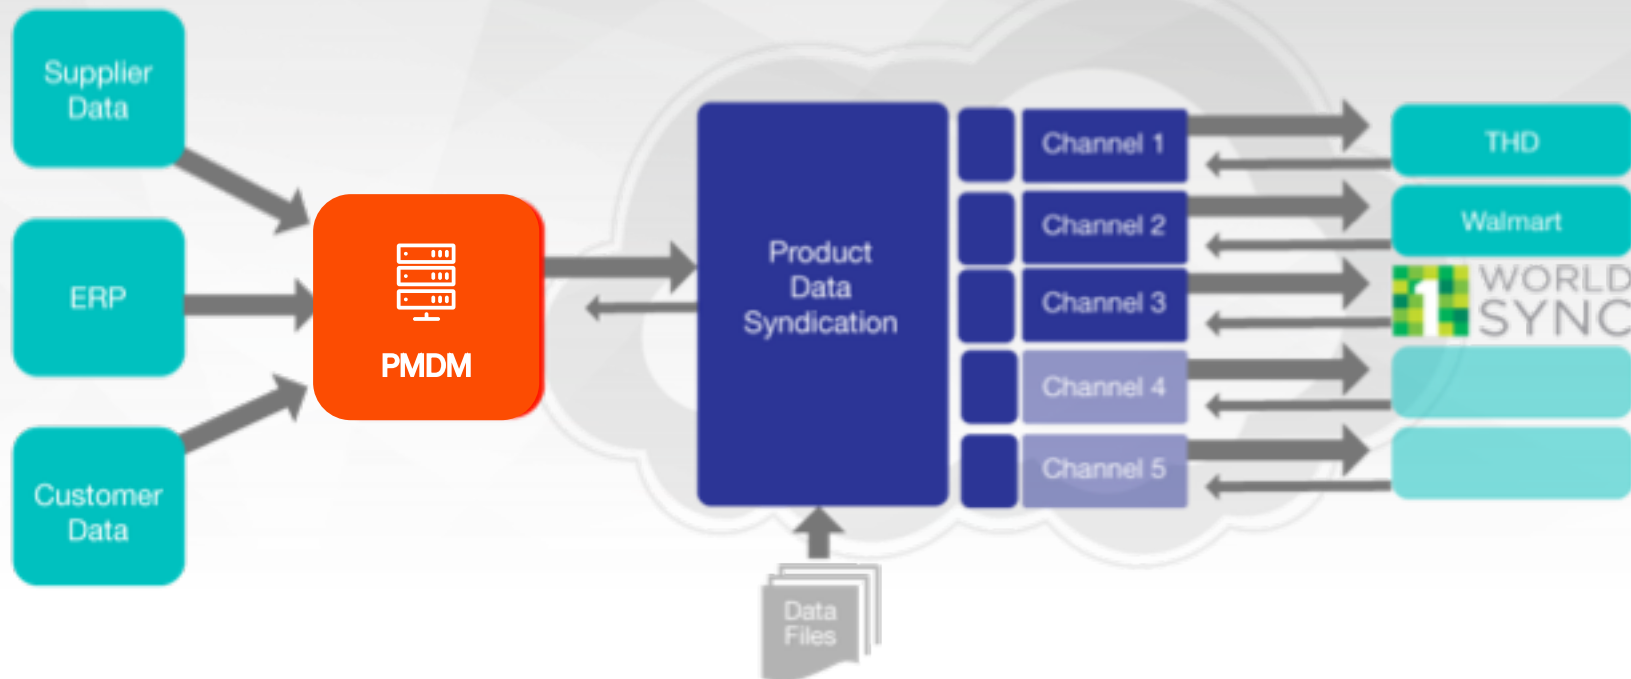

- ◆ Deliver Product MDM master data to all stakeholders, in support of various business initiatives
- ◆ Gather data governance feedback and report back for MDM Governance
- ◆ Product data stewards can see channel publication status in the Web UI
- ◆ Leverage increased channel support for additional channels as you move forward

# GDSN Publisher Solution

- ◆ Publish directly to 1WS GDSN Data Pools through the Product Data Syndication Engine
- ◆ Manage item registration and publishing status quickly and efficiently
- ◆ Map information from Product MDM Data Models directly to GDSN Data Standards
- ◆ Adopt data standard changes by managed service framework

# GDSN Receiver Solution

- ◆ Golden record enhancement for buy-side / sell-side configuration
- ◆ Efficiently manage complex industry standard data structures
- ◆ Use one technology, with separation of data models, responsibilities and workload
- ◆ API enabled message orchestration
- ◆ Meets necessary and typical retail requirements for role based product line and product data management

# Translation Service Integration

---

- ◆ Reach and engage audiences worldwide across multiple channel languages
- ◆ Enable high-quality translation with Lionbridge Translation Services through ClayTablet™ integration

Lionbridge

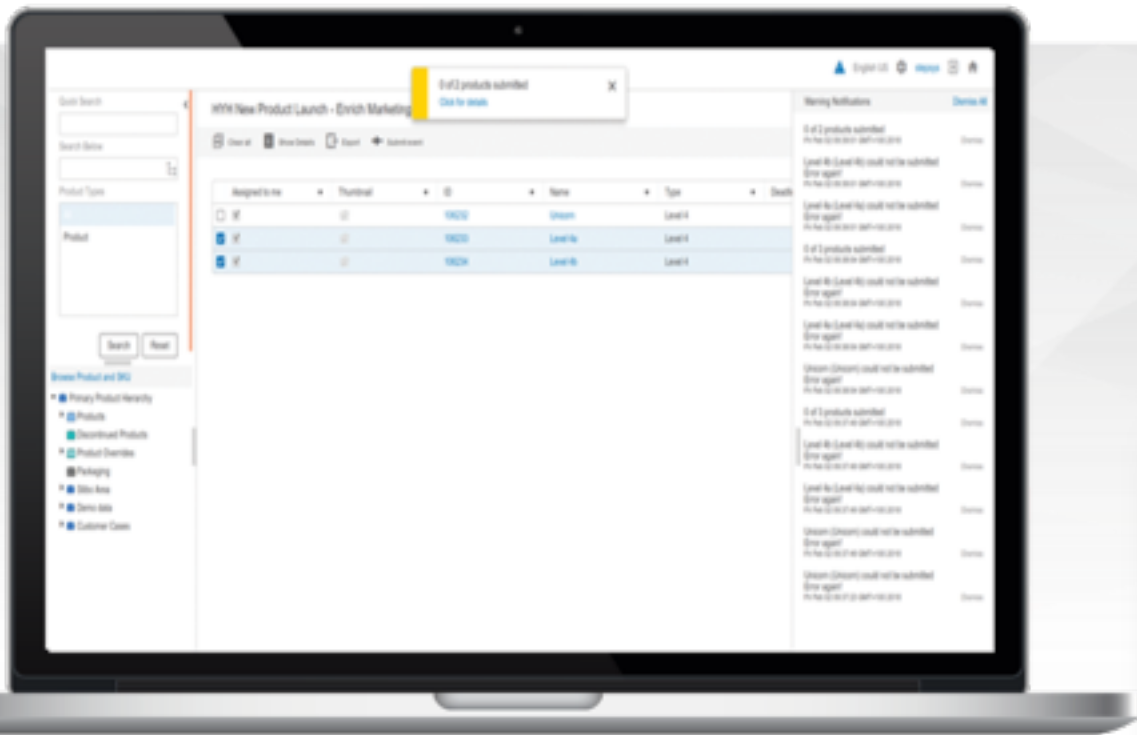

# User Experience, Data Governance & Workflow

- ◆ Improved Error Messaging and Error Handling in the Web UI
- ◆ Workflow Visualization for improved item tracking in workflows (“Where is my item?”)
- ◆ Enhanced Web UI Styling, icon fonts, and more

Planned Colors: Blue

Planned Number of Colors: 1

From **Reading, United Kingdom** 13 December 2017

Delivered to **Kollam, India** 19 December 2017 18:20

Shipment number: 157901588  
Customer reference: TP-1496040  
Shipment info: 1 item

Signed by SKARIYACHAN

Local time	Location	Action
19 December 2017 18:20	Cochin Others	Shipment delivered in good condition
18 December 2017 22:29	Basel Bso	Shipment in transit
16 December 2017 17:08	Cochin Others	Shipment handed to third party. They will complete delivery
16 December 2017 17:06	Cochin Others	Shipment now at depot nearest to delivery address
16 December 2017 14:38	Cochin	Shipment in transit
16 December 2017 13:51	Cochin	Shipment arrived at connection point
15 December 2017 21:45	Bangalore	Shipment in transit
15 December 2017 0:20	Bangalore	Hold at TNT location. Awaiting post departure

# Composite Attributes for Products

- ◆ Efficient Data Capture for Manufacturing Industries
- ◆ Non-typed data
- ◆ Technical Specification Tables
- ◆ Data Syndication Platform Channel Status

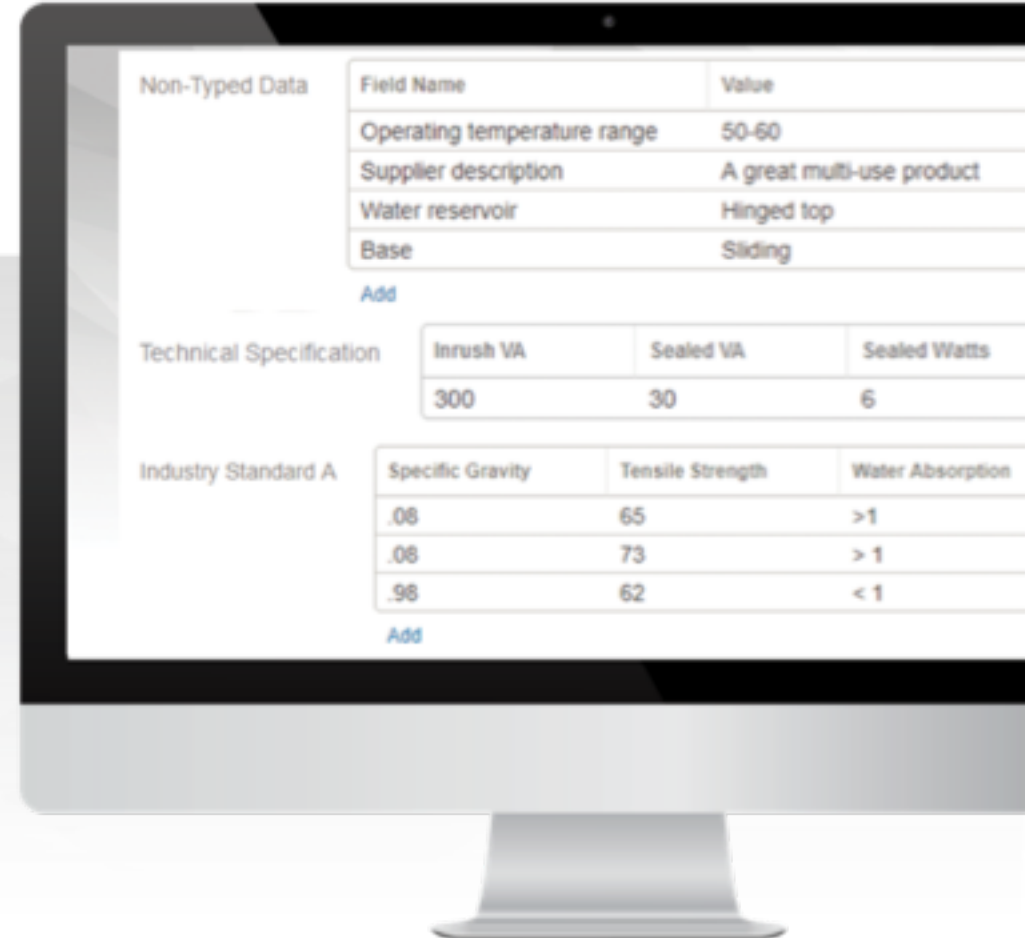

Class 8502 Type WF Vacuum Contactor

## Electrical Ratings

Characteristic	Size 4	Size 5	Size 6
<b>Maximum Motor HP at:</b>			
250 V	42	75	150
280 V	50	100	200

.08	65	>1
.08	73	> 1
.96	62	< 1

Add

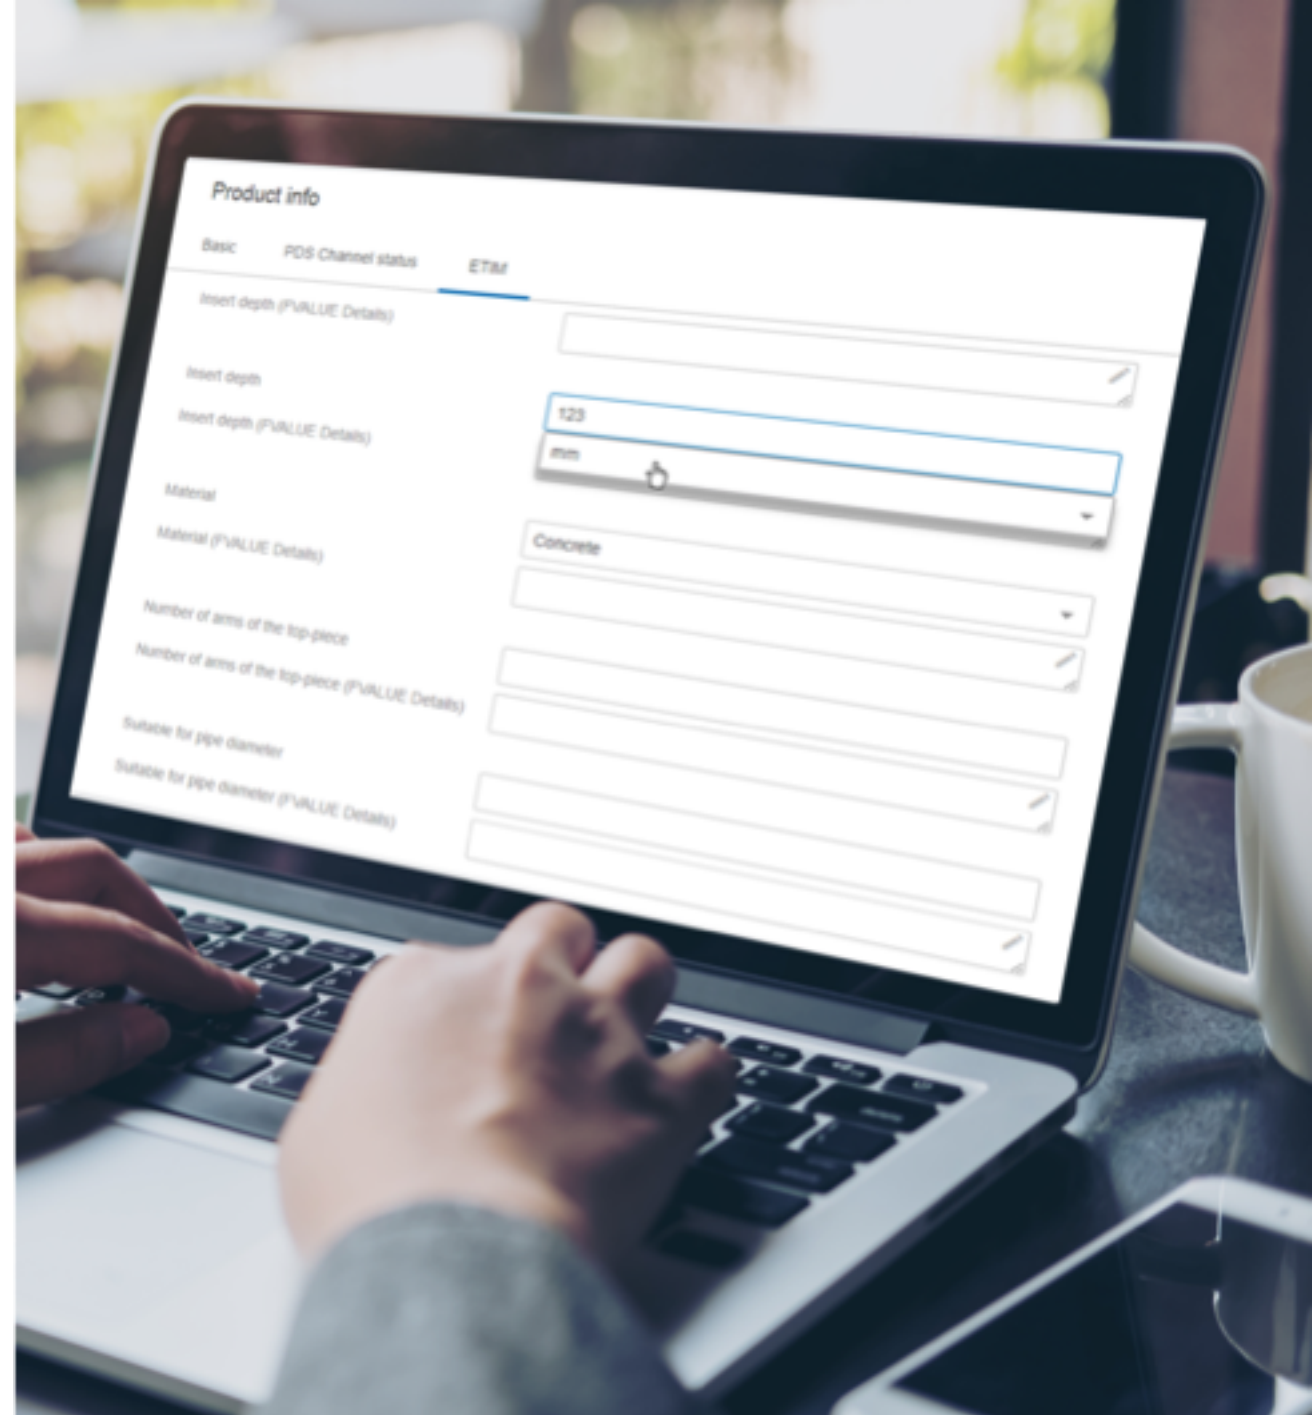

# Guided Data Entry

- ◆ Easily set up products with step-by-step instructions via a wizard
- ◆ Quickly break down data maintenance tasks into more manageable steps

# Industry Standards Update

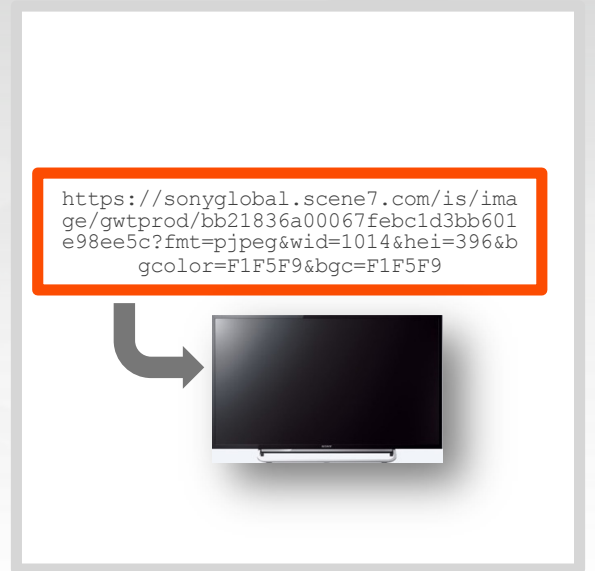

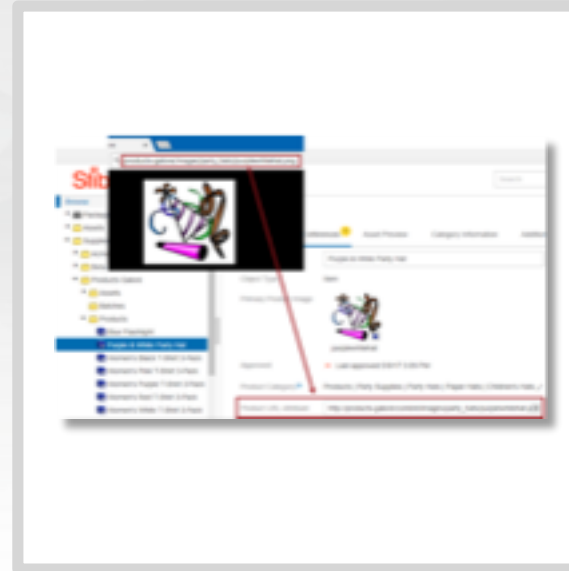

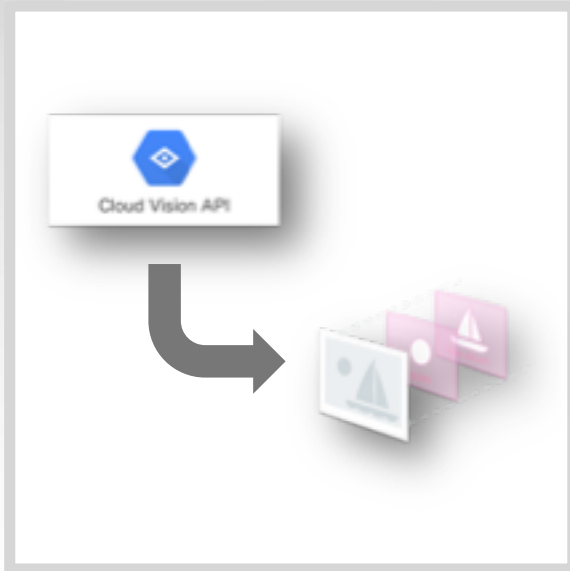

- ◆ Improved user experience for ETIM in Web UI for easier ETIM data maintenance
- ◆ Easy configuration of BMECat export
- ◆ Cross context exports for BMECat 2005 plugin
- ◆ Data Model alignment across ETIM versions

# Improved Image & Asset Management

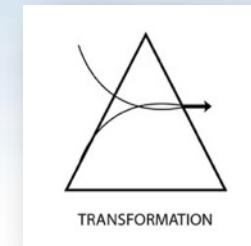

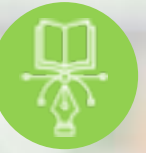

- ◆ Improved supplier asset onboarding via supplier fed asset URLs
- ◆ Improved image and asset upload widget in the Web UI
- ◆ Cloud service integration for image metadata extraction

# Print Publishing

- ◆ Enable publishing experts to search and find product instances
- ◆ Empowered table transformation capabilities
  - ◆ Unique units in header rows
  - ◆ Enhanced row/column suppression rules
  - ◆ Merge row/column rules
  - ◆ Header/footer handling
  - ◆ Formatting options on merged row/columns

# Data Exchange and 3<sup>rd</sup> Party Tool Integration

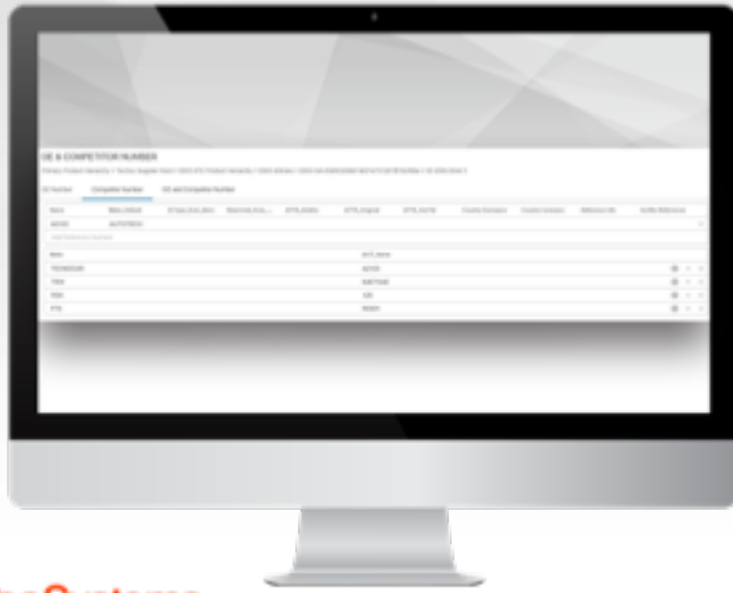

- ◆ Completing the Amazon SQS Story by delivering S3 enabled solutions for end-to-end integration with Amazon Queuing System
- ◆ FAB-DIS export option (ETIM & Media Tabs)
- ◆ Recertification of MDM 9.0 for SAP Integration via SAP process integrator

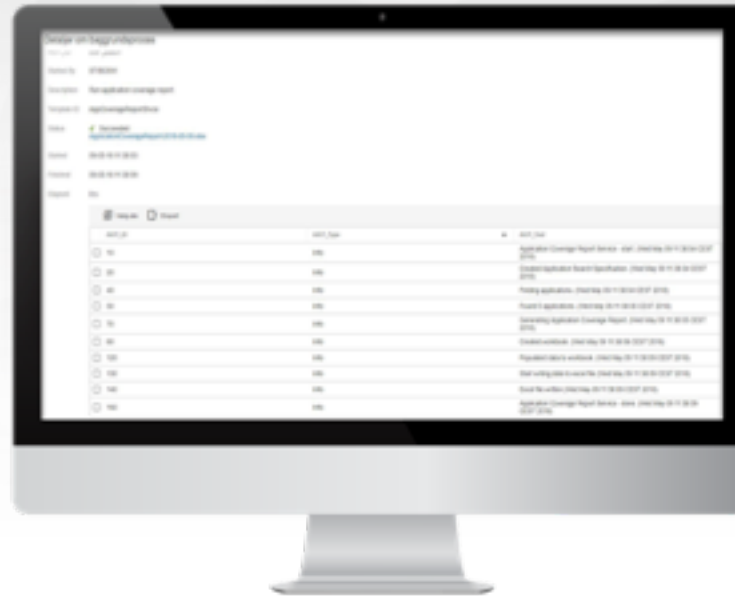

# Automotive

- ◆ Support for country specific compliance regulations
- ◆ OE and competitor parts management and analysis
- ◆ Improved coverage report for finding missing applications for parts
- ◆ Data onboarding area for automotive retail

# Customer MDM 9.0 Highlights

# 9.0 Release Customer MDM Highlights

---

**Data Governance –  
Data Quality Policies:  
Manage, Monitor  
and Enforce**

**User Experience:  
Task List Filtering  
& Prioritization**

**Improved,  
Configurable Data  
Matching**

**Enhanced Postal  
Address Formatting  
and Display**

# Data Governance – Data Quality Policies: Manage, Monitor & Enforce

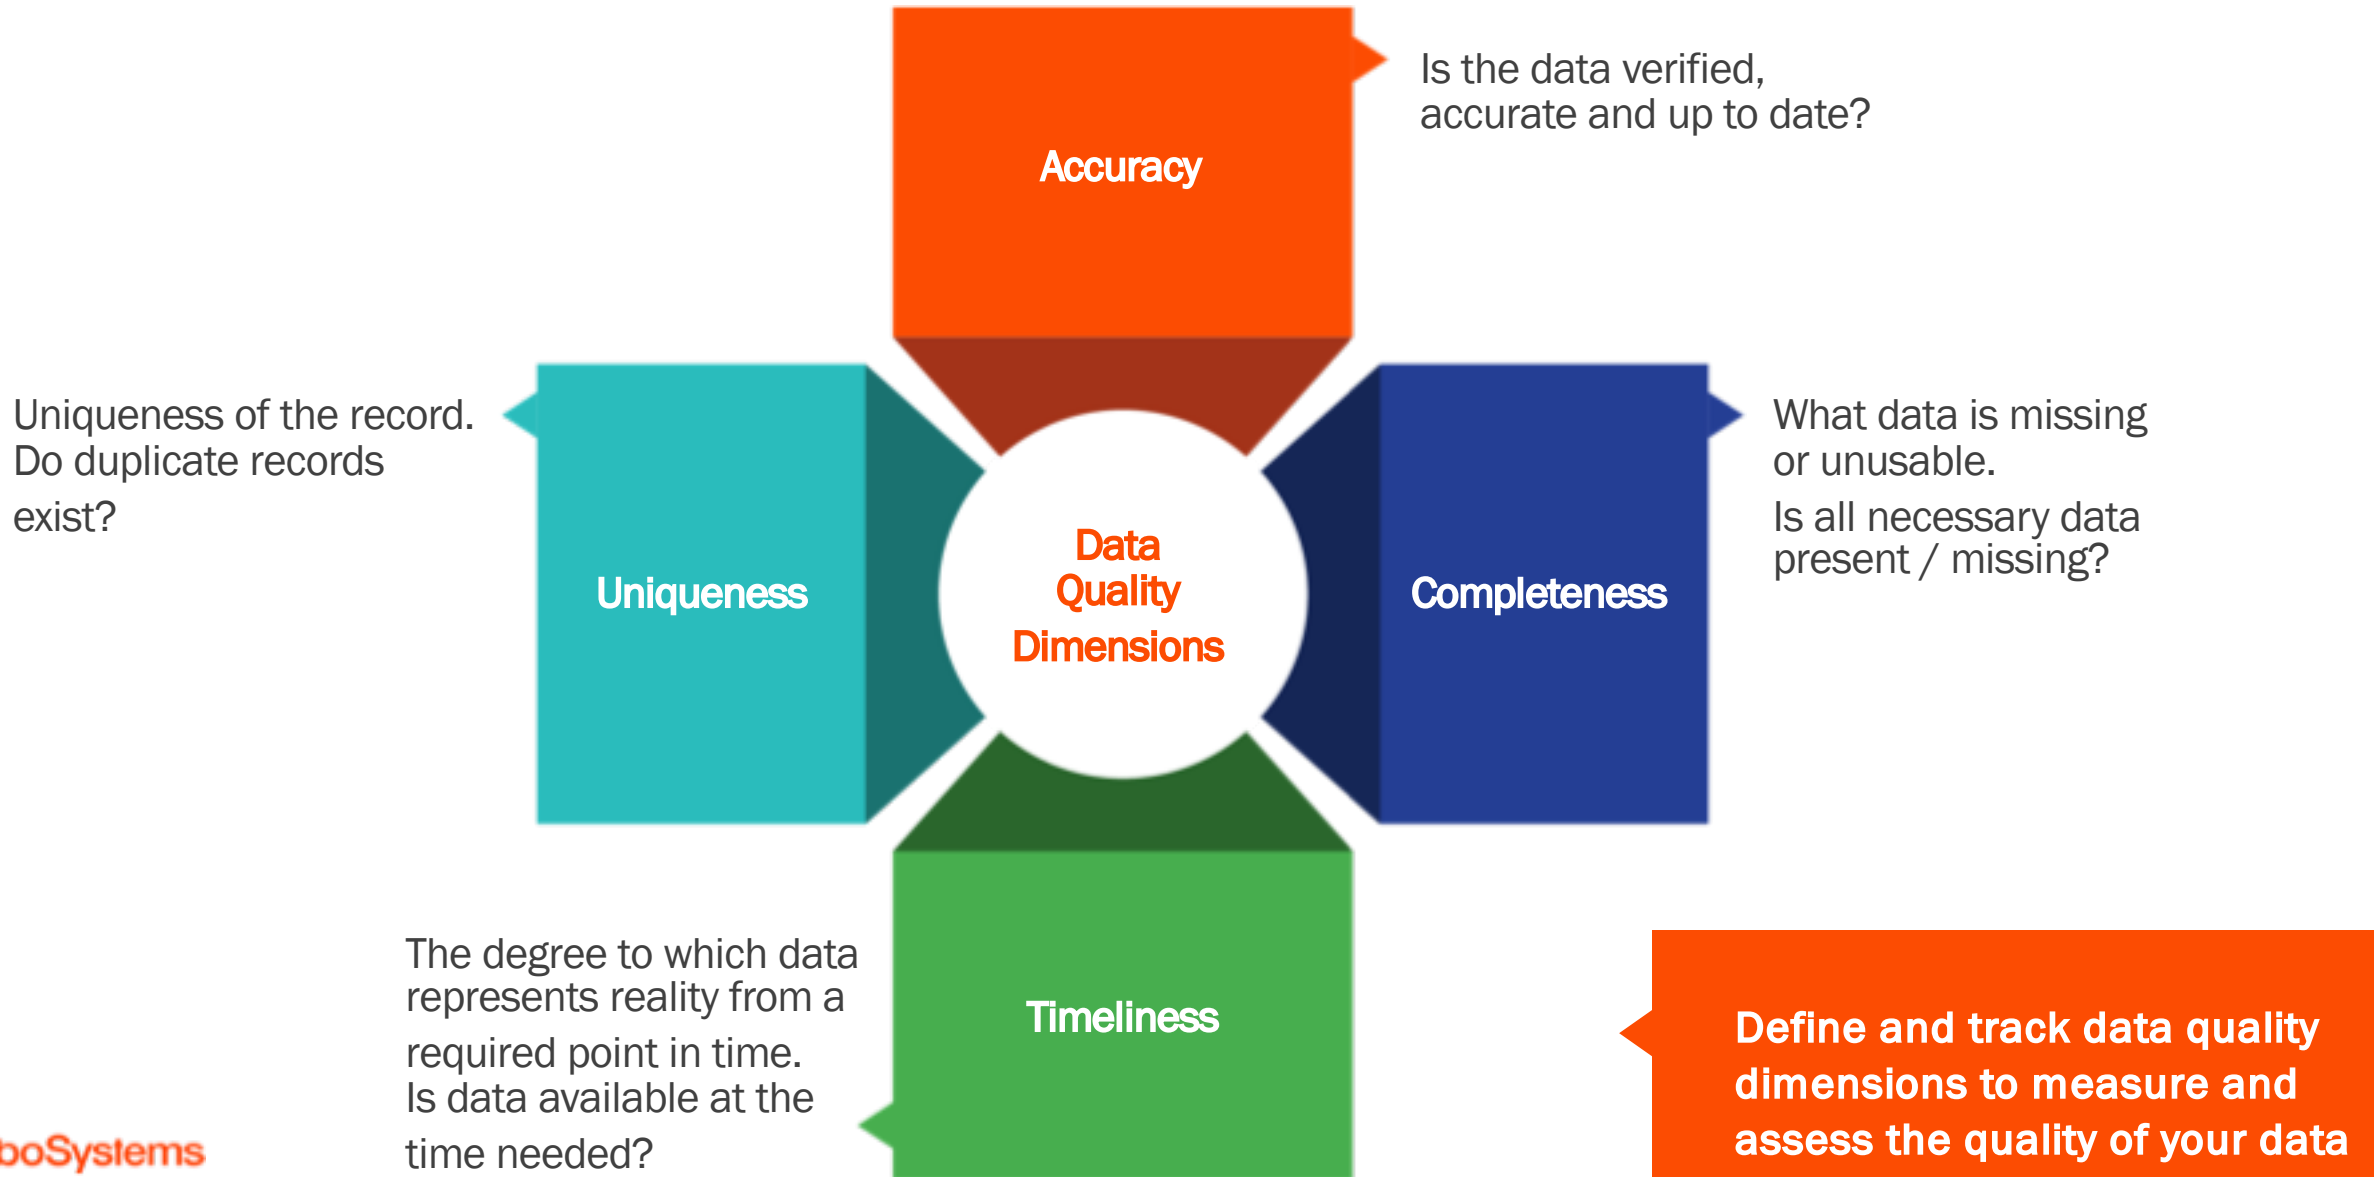

**Proactively monitor, control and maintain customer data by defining data quality policies which are monitored and enforced by CMDM**

- ◆ Build policies to ensure data completeness, uniqueness, accuracy and more
- ◆ Monitor master data within CMDM as well as inbound data from source systems empowering operational monitoring
- ◆ Define KPI thresholds and customized scoring models
- ◆ Monitor and enforce policies through KPI's and notifications to improve data quality and boost effectiveness
- ◆ Quickly monitor and manage data quality KPIs using visual dashboards and reporting

- ◆ **Ensure customer data is actionable**
- ◆ **Adhere to regulatory compliance**
- ◆ **Empower improved information stewardship and governance**
- ◆ **Sustain the level of data quality and effectiveness to meet business expectations**

# Data Quality Policies – Data Quality Dimensions

# Task List Prioritization and Filtering

**Customer MDM proactively guides users to focus efforts to drive business value and boost productivity**

- ◆ Flexibility to define high priority tasks based on your organizational business needs
- ◆ Data stewards are intuitively guided to high priority tasks – focusing attention when and where it is needed most
- ◆ Automatic notifications of high priority tasks
- ◆ Filter and display clerical review tasks by priority

- ◆ Empower proactive approach to data stewardship activities
- ◆ Increase clarity to drive user performance and productivity

# Improved Postal Address Formatting and Display

## Improve how addresses are display throughout Customer MDM

- ◆ New calculated functions to output formatted addresses
- ◆ Export formatted addresses to downstream business systems; single-line or multi-line
- ◆ Use independently or in combination with pre-built verification services powered by Loqate
- ◆ Automatically generate properly formatted addresses with the correct geographic context

- ◆ Drive Web UI usability and consistency
- ◆ Boost effectiveness of downstream sales, service and marketing activities

# More Powerful, Configurable Data Matching

Drive quick time-to-value and improve Customer MDM implementation experience

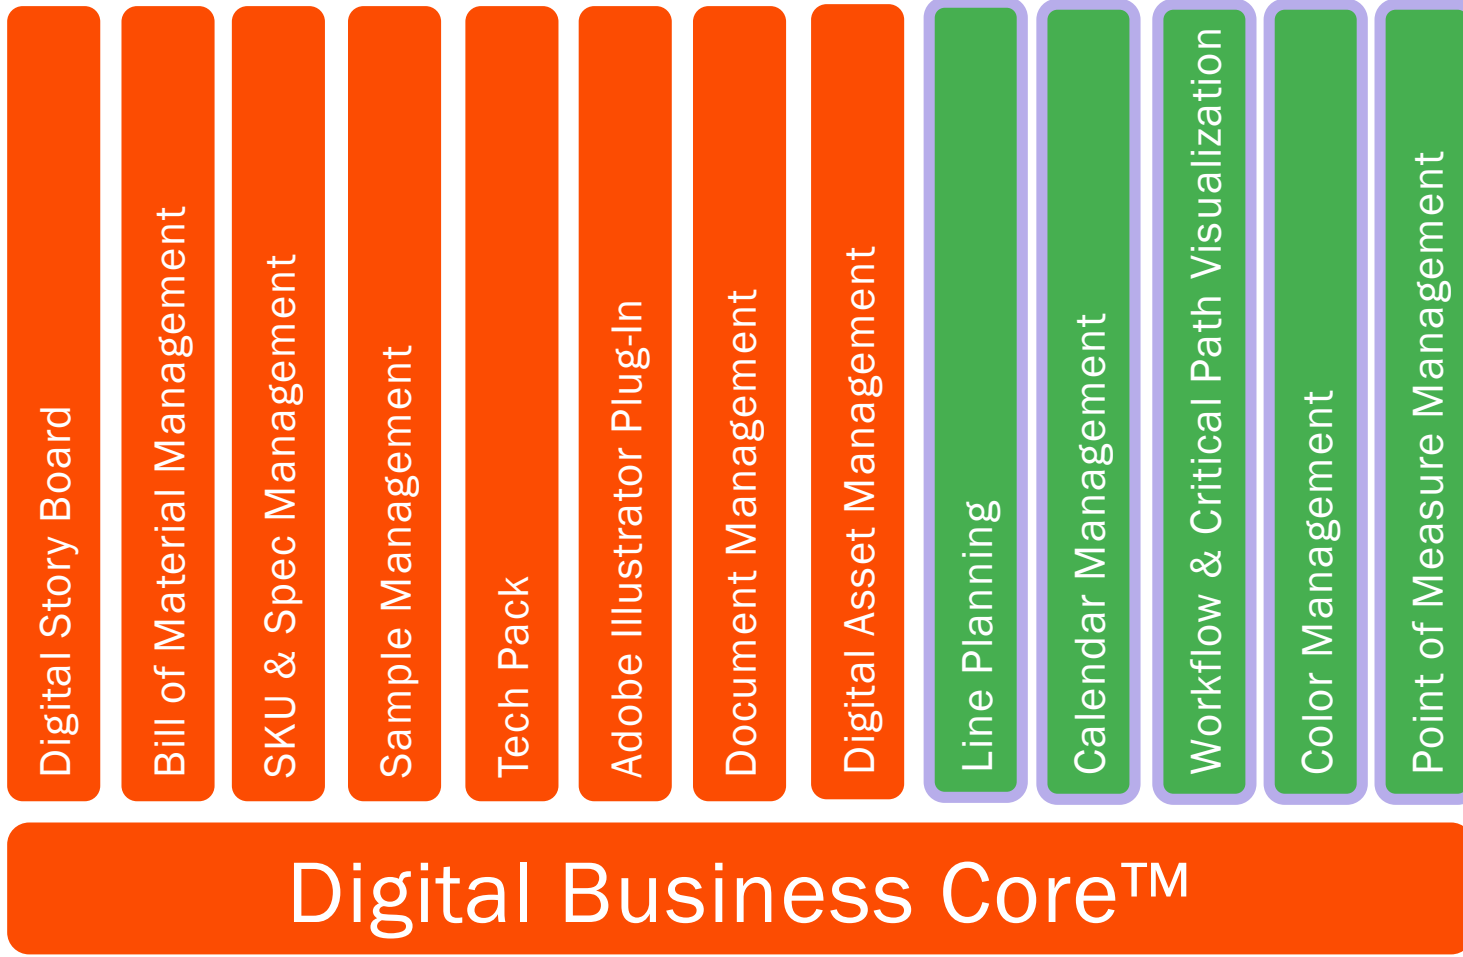

- ◆ Support for a range of organization elements including name, legal variants and sub division/department
- ◆ Scalability and robustness of party data matching has been improved
- ◆ Pre-built organization name normalizer and matcher

- ◆ Improve overall data quality throughout your enterprise
- ◆ Return more matches and reduce manual reviews

# Merchandise Assortment & Line Planning

**Enable merchandisers  
to have the right product mix at  
the right time**

- ◆ Plan everything from business financials to product development
- ◆ Forecast budgets and financials
- ◆ Align designers with line plans by tracking planned colors and materials against the styles in the line
- ◆ Link storyboards to line plans and gain visibility to what materials are being used

- ◆ **Increase Competitiveness**
- ◆ **Accelerate Speed to Market**
- ◆ **Improve Product Margins**
- ◆ **Expand product breath in category/brand and regions/channels**

# Calendar Management

## Avoid missed deadlines and keep teams on track

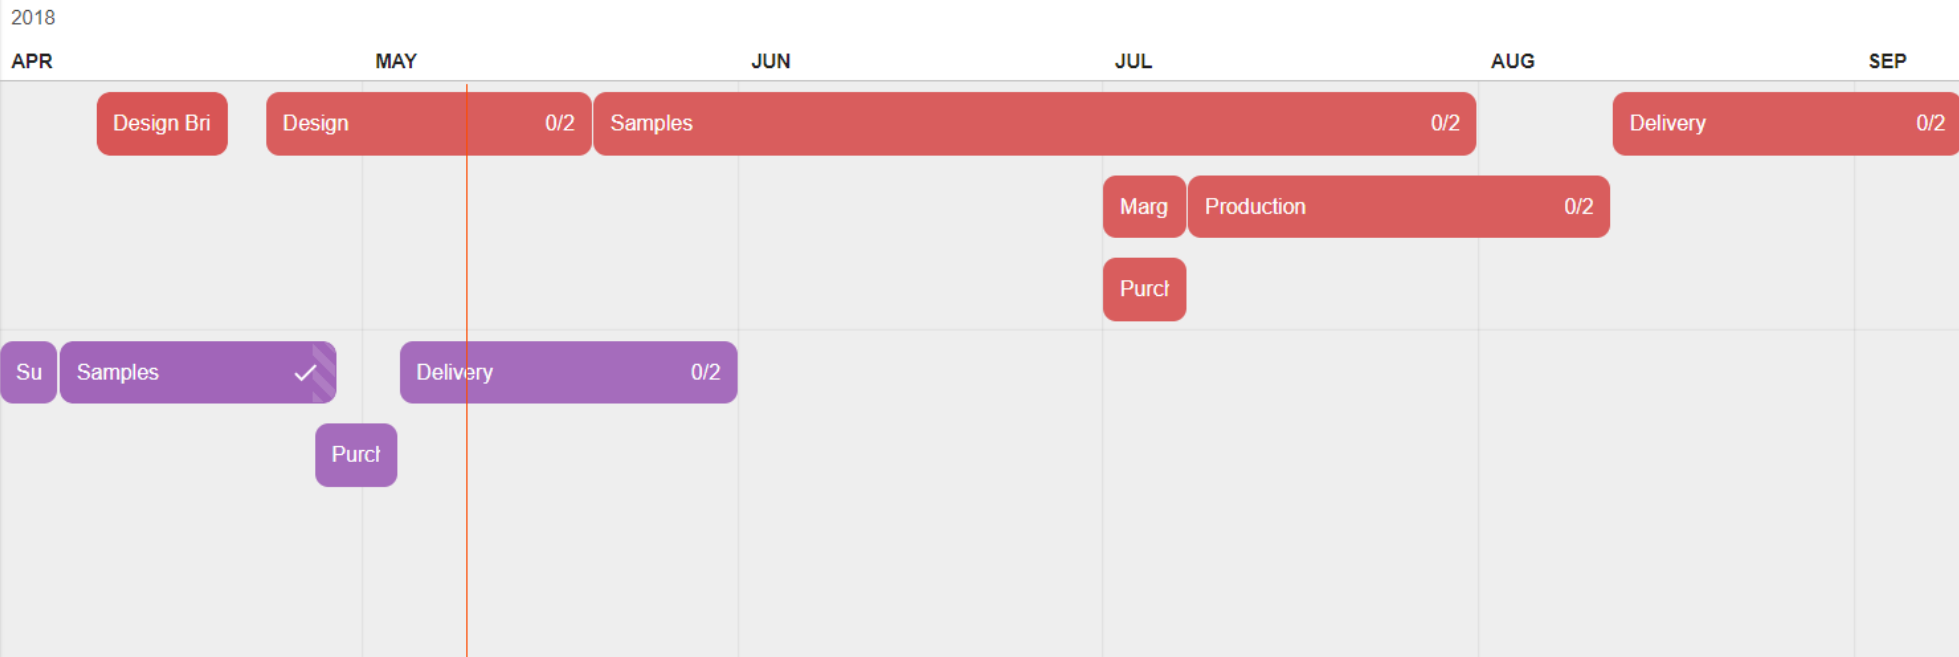

- ◆ Gain complete product development visibility across the enterprise, reducing redundancies, saving time and ensuring accountability
- ◆ Define beginning and end dates, owners, dependences, activities and critical paths
- ◆ Graphical calendar of milestones and tasks with visual indicators
- ◆ Create and execute line plans and schedules based on seasons or collections
- ◆ Create and maintain schedule of activities required to execute line plans

- ◆ Accelerate Speed to Market
- ◆ Reduce Product Cost
- ◆ Increase Operational Efficiency

# Workflow Visualizations

---

**Easily get an overview of your work process**

- ◆ Graphical representation of all product lifecycle processes
- ◆ Create a work process steps
- ◆ Group individual workflow stages into a work process step

- ◆ Easily see status of product
- ◆ Identify issues faster

# Workflow Visualizations

- ◆ Data Stewards benefit from **a clear graphical view of the work process a product is part of.**

# Bill of Materials (BOM) Management **ENHANCED**

**Streamline your product development process from design, through supply chain and manufacturing**

- ◆ Single, complete, and accurate structure of a product, its definition and information
- ◆ List of the components, parts, assemblies, quantities, and other information needed to manufacture an end product
- ◆ Raw material details with direction for gathering and using the required materials

## **Benefits**

- ◆ **Ensure On-Time Delivery and Quality**
- ◆ **Improve Supply Chain Agility**

# Specification Management **ENHANCED**

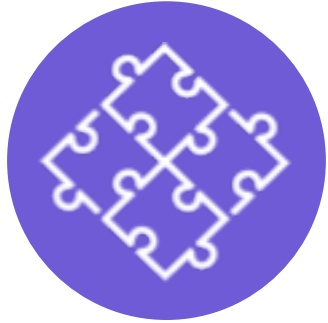

Aggregate and structure product information so you can manage, edit and share product histories with retailers, manufacturers and suppliers

- ◆ Meet the unique requirements of your various product types
- ◆ Manage BOMs, image pages/sketches, and documents across all variants
- ◆ Streamline supplier collaboration
- ◆ Reduce sample cycle time and errors

## Benefits

- ◆ **Improve on-time delivery**
- ◆ **Control cost and quality**
- ◆ **Increase productivity**
- ◆ **Ensure compliance**

# Platform 9.0 Highlights

# 9.0 Platform Release Highlights

---

**In-Memory  
Improvements**

**Open  
Platform**

**Load  
Balancing**

**Authentication**

# In-Memory Performance Improvements

---

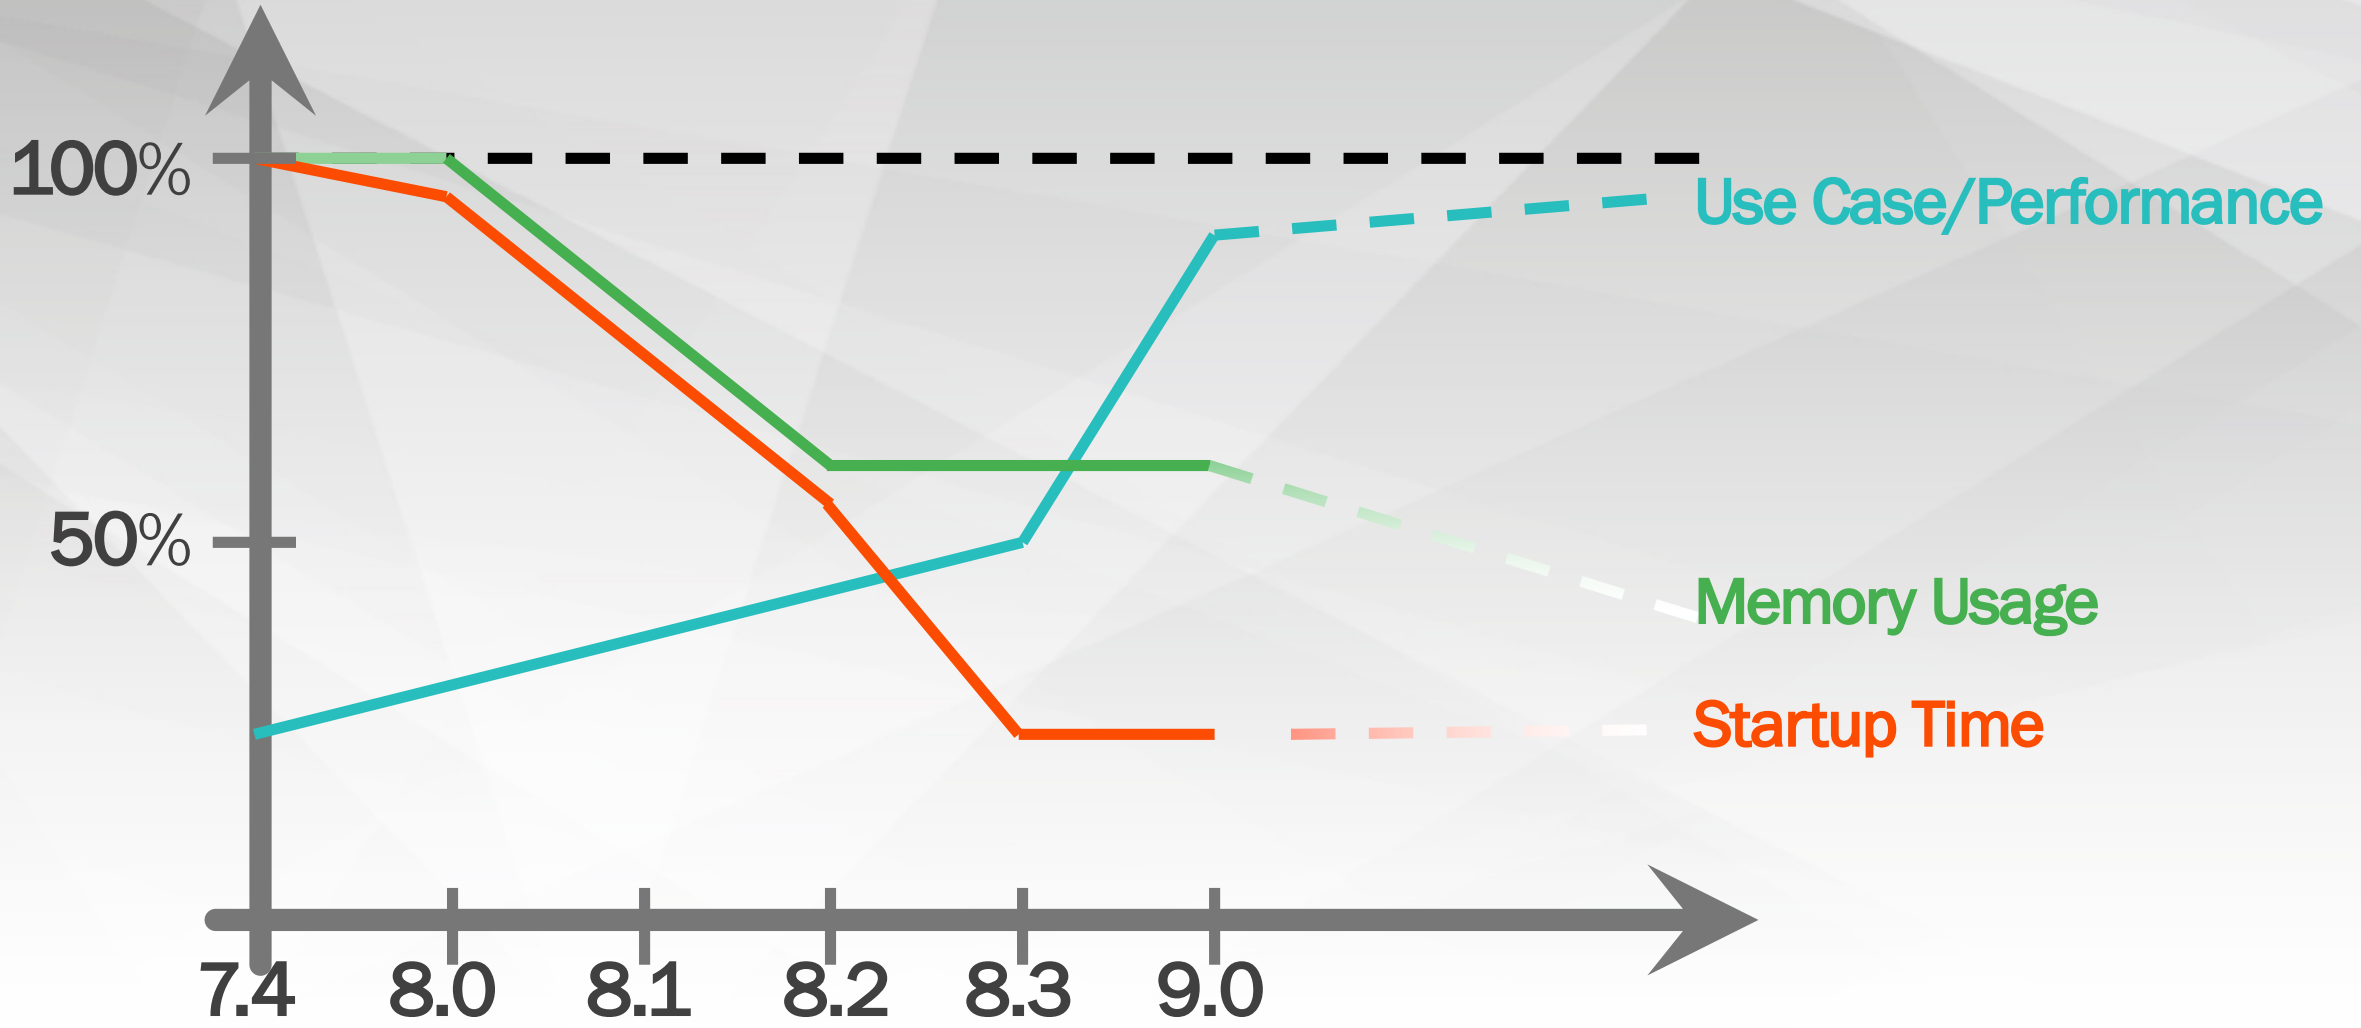

**Platform optimized for continuous improvement in exports, searches, LOV lookups and more**

- ◆ Query API accelerated, including ability to run inside transactions and business rules
- ◆ LOV lookups and various other queries
- ◆ Next level of STEP Exporter optimization
- ◆ Searches optimized: inherited values, numeric, regular expressions, data containers and more

◆ Overall platform performance, speed and efficiency improvements

# In-Memory Performance Evolution

# Open Platform Improvements

---

## Continued advancement of the STEP platform's openness and connectivity

- ◆ New JSON-based REST API (phase 1)
- ◆ Scripting API additions including improve query facilities
- ◆ JavaScript Business Rule improvements:  
Ability to test from JS plugin, line numbers, additional binding options, more logical binding ordering, improved exception handling
- ◆ Business Functions feature completeness:  
Support for more return types, ability to make parameters optional on the caller side

### Comment from Stibo Customers:

**“You’ll never be able to build everything that all your customers need. So give us the ability to build it ourselves”**

**- so this is what we do, constantly improving openness and connectivity in each and every release of STEP.**

# Authentication – Enhanced Platform and Data Security

---

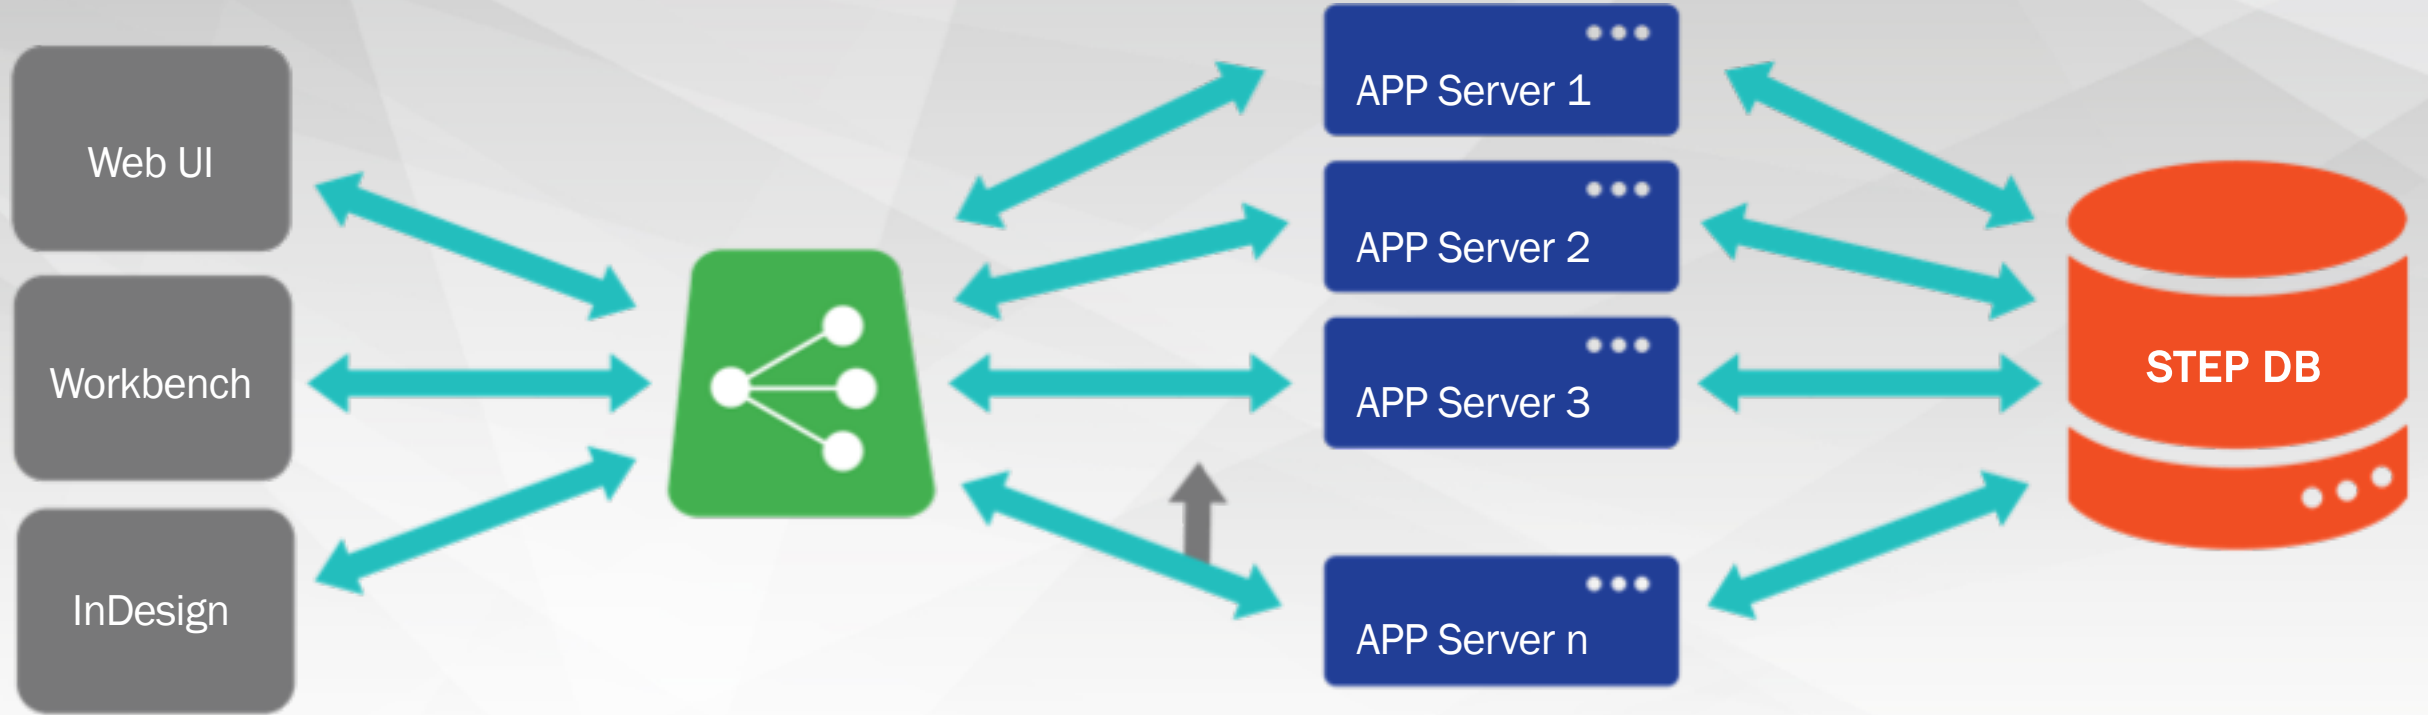

## **New default SAML implementation:**

- ◆ Pre-release testing with specific customers to begin February 18, 2018
- ◆ Built on common customer use-cases gathered over last three years

## **Smartsheet support for Single Sign On:**

- ◆ Token-based authentication
- ◆ Supports the STEP SSO implementations: Kerberos, Trusted Headers, SAML and Oauth (Google Implementation)

# Load Balancer becomes part of the STEP platform

A photograph of two hands holding lit sparklers against a dark background with bokeh lights. The sparklers are bright and glowing, with sparks falling around them. The hands are visible at the bottom of the frame, holding the sticks of the sparklers.

# Thank You

StiboSystems
