2023.4 Partner Overview Q&A

Q1: Is there any special configuration which we need to enable for Instrument UX?

A1: Please reach out to your Partner Manager or your customer's Stibo Account Manager to make sure that the use cases required are covered in this iteration of Instrument UX as well as the system prerequisites. That overview can be found in our online Instrument documentation with this 2023.4 release. There will be a need for a license with various components, including Elasticsearch, to be enabled to utilize Instrument for existing customers.
