

March 27, 2024

2024.1 Customer Overview Q&A

Q1: Is 2024.1 GA ?

A1: Yes, it is GA as from today, March 27.

Q2: Will there be a better Debugging Functionality for Business rules?

A2: We are looking into improving the JavaScript environment and some specific improvements planned. But visual debugging is unfortunately a very big task that we cannot give a timeline for now at this time.

Q3: Is there any initiative that Stibo is taking to turn STEP low code?

A3: Please let us discuss, we are looking for ways to reduce the amount of configuration and code.

Q4: Is the Workbench Facelift also available for on-premise environments?

A4: Yes, it is available for all.

Q5: Any plans to natively employ AI for content generation?

A5: An initiative for Generative Product Description is currently being assessed and is part of our current roadmap.

Q6: I was not able to make the entire meeting and I'm trying to view the recording, but it looks like I don't have permission to view it.

A5: We are working on editing the recording for a pleasant "replay experience" and we will make it available later today. Stay tuned!
