

April 25, 2025

**Dear Stibo Systems customer,**

We are pleased to announce that we have started support for TLS version 1.3 for encrypted HTTPS communication with our SaaS MDM application. This upgrade is independent of your STEP release, and is part of our ongoing commitment to ensuring the highest level of security for our Master Data Management (MDM) application.

Please note that we will **end support for TLS version 1.2 by June 25th, 2025**. We strongly encourage all customers to transition to TLS version 1.3 to continue enjoying secure and uninterrupted service.

Our focus on security remains paramount, and we are dedicated to keeping our MDM application secure. You can verify the support of TLS version 1.3 on your workstation by visiting our TLSv1.3 test page at <https://tls-check.mdm.stibosystems.com/>.

### **TLS 1.3 Confirmed**

You have successfully reached our server. This is to confirm that your workstation and web-browser will be able to support the stronger security protocol when we start to enforce TLS version 1.3 by de-supporting the older TLS version 1.2 on June 25<sup>th</sup>, 2025.

Please pay attention that your organization takes measures to also validate TLS version 1.3 support for integrations that may exist for transferring data from your business applications and to the SaaS MDM application managed by Stibo Systems.

Best regards, Stibo Systems

If you see this page, it means your workstation and web-browser will support TLS version 1.3. Please note that any integrations transferring data from your business applications to the SaaS MDM application may need further assistance from you to continue operation after ending support for TLS version 1.2 on June 25<sup>th</sup>, 2025.

If you have any questions or concerns, please don't hesitate to contact Stibo Systems Support at <https://service.stibosystems.com>.

Thank you for your cooperation and understanding.

Best regards,

Stibo Systems
